EDUCATION

Sinhgad Institute of Technology

BE, Mechanical Engineering

(July 15, 2018 - July 30, 2021)

WORK EXPERIENCE

Infosys

Frontend Developer

(October 11, 2021 - Present)

- Built **Performant,interactive and reusable components** in **JavaScript ,Reactjs** for an internal CRM tool providing an all-in-one solution for managing customer policies. This internal tool allows users to create, modify, and manage policies, offering a 360 degree view of customer accounts and **reducing IVR calls by 60%**.
- Worked on Internal Node.js application** for organization-wide use, enabling teams to **send emails, faxes, and messages** to internal and external business customers. The system integrates with Zeta and SFMC, providing a unified communication platform utilized by multiple teams across the organization
- Working on a car selling platform using **React.js with integrated AI**, featuring a conversational AI agent powered by **Azure AI services**. The AI agent interacts with customers, answering queries and providing tailored information using knowledge base, enhancing the user experience and streamlining the purchasing process.
- Contributed in fixing issues, adding new features,enhancements using React.js

PROJECTS

Shopsavvy-Ecommerce store

shopsavvy ecommerce front store

(September 25, 2023 - October 30, 2023)

- Crafted a feature-rich Ecommerce website using **Next.js 13** and **React**, MongoDB cloud delivering seamless user experiences.
- Implemented essential functionalities including user authentication (**login/signup**), intuitive cart management (**add to cart, buy now**), and secure payment integration with **Razorpay**.
- Ensured optimal performance and scalability by utilizing **MongoDB Cloud** for robust data storage and management
