EDUCATION

Sinhgad Institute of Technology

(July 15, 2018 - July 30, 2021)

BE, Mechanical Engineering

WORK EXPERIENCE

Infosys

(October 11, 2021 - Present)

Fullstack Developer

Conversational AI Assistant for Car Buyers

React.js, Node.js, Azure AI, OpenAI, Azure devops

- Developed an advanced AI-driven Customer Relationship Assistant (CRA) using React.js, Azure AI, and OpenAI,designed to enhance post-purchase engagement for car buyers
- Built a conversational AI agent that leverages a dynamic knowledge base & custom AI prompts to handle real-time, personalized interactions with customers, answering inquiries, guiding buying options, modifying selections based on user inputs Enhances customer satisfaction & retention by offering a 24/7 intelligent assistant reducing post-sale human support by 40% and improving onboarding experience by 25%.

Internal CRM Tool – 360° Customer View

AngularJS, React.js, JavaScript

- Migrated a legacy internal CRM platform from Angular to React.js, reducing frontend load time by 30% and improving modular reusability by 40%.

ProHireX – Multi-tenant Job Portal Platform

Node.js, React.js, MongoDB, OpenAI, Express.js

- Lead backend & contributed to frontend for a Naukri-like job portal.Enabled job posting, subscriptions, and LinkedIn integration per tenant.
- Integrated OpenAI API to parse resumes for better candidate matching.Implemented RBAC role-based login, paid profile views & free profile imports

Enterprise Messaging System

Node.js, React.js, Zeta, SFMC

- Built & maintained an internal Node.js messaging system used across the organization, enabling seamless communication via emails, faxes, and messages to external and internal business customers
- Integrated Zeta & SFMC into the messaging platform, ensuring a unified communication experience for multiple teams.

PROJECTS

Shopsavvy-Ecommerce store

(September 25, 2023 - October 30, 2023)

shopsavvy ecommerce front store
